Report to the Board
July 19, 2002

Accomplishments since Spring, 2002

1. The AAUW NC web site look and feel was upgraded
   - Consistent navigation buttons on all new pages
   - Banners for branches on the state home page.
   - Lists of relevant links on the left of all pages.
2. Automated collection of branch officer information and distribution of officer counterpart information.
3. Supported the start of the AAUW NC Online Satellite with Winston-Salem as the host branch.
4. Survey on AAUW NC e-mail list showed good acceptance by the board. Members less connected to the state organization were less well served by the list.
5. Continued tech consulting to NC Women United. They are still borrowing web space from AAUW NC.
6. Began analysis of discrepancies in the spring and summer Tar Heel News mailing lists. As a side effect, found a list of 15 members in 10 branches with "bad addresses" and forwarded those to branch contacts for resolution.
7. Completed draft job description - see attached.

Plans (by Fall Board meeting)

1. Prepare a more general policy on electronic communication (balancing privacy and visibility) for the board's approval. (Volunteers to review this would be appreciated. Please contact Laura or me.)
2. Encourage all AAUW NC board members with programmatic responsibilities to contribute summary information for the web site.
3. Implement "digest" option for those who would prefer collections of e-mail messages related to AAUW NC.
4. Create a flyer that works as an introduction to the web site -- for the AAUW NC 2003 Convention.

Deferred (need does not appear critical)

1. Discuss registration of www.aauwnc.org (budget impact of $70 for two years).
2. List of technology camps on the web site.
